1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Katehi et al.

Note Fig. 3a, where the recited "dielectric board" reads on the combination of layers 73, 84, 100 and 105; the recited "two strip conductors" read on microstrip lines 72 and 74; the recited "at least one hole filled with conductive material" reads on any one of vias 102; the recited "resistive structural part" reads on layer 78; and the entire Fig. 3a device can be made monolithic (see column 4, line 2).

Also note that the claims which recite "Wilkinson divider", "Lange coupler", etc do not define over Katehi et al because they do not include any structural features which differentiate the claims over this reference (the claims are essentially reciting "Wilkinson divider", "Lange coupler" as the preamble.

2. Claims 1-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Swarup.

As to claims 1-6, note Figs. 3A and 3B, where the recited "dielectric board" reads on the combination of layers 82, 86 and 90; the recited "two strip conductors" read on any two turns of spiral conductor 64; the recited "at least one hole filled with conductive material" reads on via 68; the recited "resistive structural part" reads on dielectric bridge 70; and the entire Fig. 3a device can be made monolithic (see column 2, lines 45-50).

As to claims 7-9, note Fig. 5B.

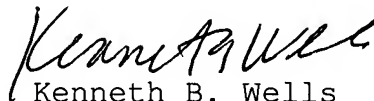

Also note that the claims which recite "Wilkinson divider", "Lange coupler", etc do not define over Swarup because they do not include any structural features which differentiate the claims over this reference (the claims are essentially reciting "Wilkinson divider", "Lange coupler" as the preamble.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kenneth B. Wells whose telephone number is 703-308-4809. The examiner can normally be reached on Monday through Friday from 7:30am to 4:00pm.
